## Financials

The Breast Cancer Detection Center of Alaska is grateful for the trust of its donors, and we are committed to serving our mission and utilizing all money raised in the most responsible way. We are committed to sound fiscal management and transparency. BCDC undertakes a full external audit of its finances every year. Our Board of Directors reviews our financials on a monthly basis. Fiscal Year 2022 financials will be available January 2023.

FY 2021/2022

### Our Mission:

To increase awareness of the survivability of breast cancer and the benefits of early detection by delivering screening services and education programs throughout the state of Alaska.

1905 Cowles St Fairbanks, AK 99709  
 907.479.3909 bcdcofalaska.org

It is a pleasure to present the Annual Report for the Breast Cancer Detection Center of Alaska to our staff, our members, and our donors. The past 12 months have been exceptionally busy and a period of significant positive change. This year we incorporated new staff, new platforms, and continued our capital campaign to raise funds for a new Mobile Mammography Unit to better serve rural Alaska.

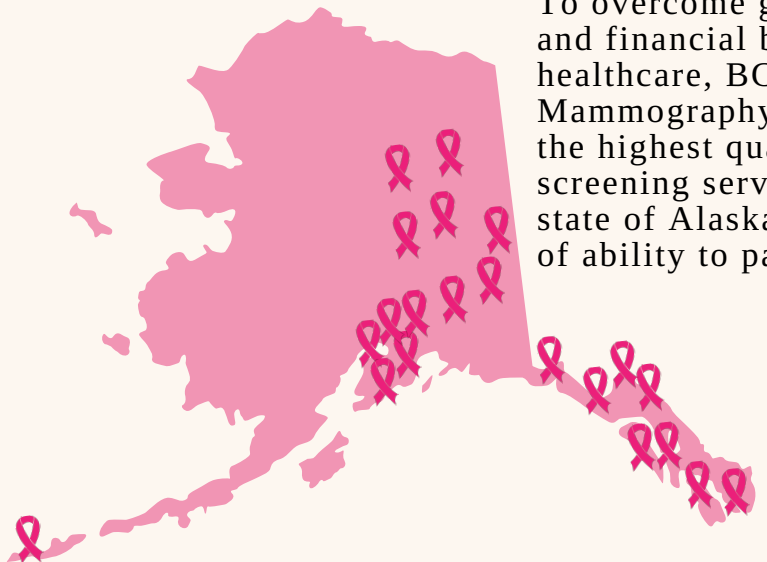

With the retirement of CEO Odette Butler, I am honored to take the helm and am excited for the road ahead. I plan to build upon the strong foundation that is BCDC, while adding to the reliable and trusted resources and care you've come to expect from us. I will work to optimize the functionality and reputation of BCDC across Alaska.

Priorities for the upcoming year include Staying True to our mission, while concentrating on new ways of helping women understand the survivability of breast cancer through early detection. The data is staggering, 1/3 of women are not up to date on annual lifesaving screening. BCDC remains committed to offering screening services to Alaskans regardless of geographical location or ability to pay for services.

I would like to formally acknowledge our staff, our numerous volunteers, and our dedicated Board of Directors whose unmatched commitment and support make BCDC the success it is for our community. I would also like to acknowledge the Waterfall Foundation who continue to generously support the BCDC mission year after year. This was a year of extraordinary growth in donors and supporters of the Breast Cancer Detection Center of Alaska. We have been there for our community because our donors and partners have been there for us. Our gratitude is shared by thousands of women across Alaska who have benefited from the generosity of our donors.

Jacyn DeBaun  
Executive Director

Angoon, AK

To overcome geographical and financial barriers to healthcare, BCDC's Mobile Mammography program delivers the highest quality breast cancer screening services throughout the state of Alaska regardless of ability to pay.
